

Make App Club Brief 1
Make it together

Theme:

Collaboration in game making

Brief/challenge:

The main aim of this brief is collaboration. This is the beginning of the Make App Club workshop activities and we want to see our participants teaming up in small groups on creative digital projects. Games come as the most obvious choice to launch our collaborative project.

Some ideas how to proceed:

- form a small group with other digital makers: you can find new friends in our workshops or via the makeapp.club platform
- find as many ways to work together as you can, for example using somebody else's designs or concepts or proposing some of yours
- discuss the direction of your game with others
- have friends choose your theme or suggest one for others
- create a multiplayer game and invite other to test and play it
- remember: the theme and authoring tools are all your choice, we are open to various fields of explorations and creative playful experience.

Timeframe:

Now till Monday 15th May

Examples/ideas:

Join some online game making communities to get inspired, just some ideas to begin with:
