Make App Club Brief 2
ELECTRICITY - Circuits & Sounds

Theme:

Electricity! Circuits and Sounds.

Brief/challenge:

We are teaming up with Keele University Makerspace Keele Make Club to run a couple of Makerspace take overs. In June we will be working with them and their great facilities around the theme of electricity. For the June take over its CIRCUITS and when they come to us in July, it's SOUNDS.

We are after some form of interactive game/presentation/website around the theme of ELECTRICITY. Any way you want to take this is fine by us. We want to showcase these creations on the July take over at Keele University on 14th.

There will be young coders and makers and their parents coming together on the 14th to play with circuits and see what you and the Stoke Sixth Form group, have created.

Timeframe:

Now till Monday 12th June

Examples/ideas:

http://www.physics-chemistry-interactive-flash-animation.com/electricity_electromagnetism_interactive/components_circuits_association-series_parallel.htm

<http://www.hyperstaffs.info/science/work/physics/bailey/electro.html>

http://www.e-smartonline.net/duke-energy/66200_games/66209_hidden_dangers_elec/index.html

These are aimed at young people and education but you can take this brief anyway you wish.

Have fun with it!
