Make App Club Brief 3
TIME:

Art and Coding – Challenge

Theme:

TIME

Brief/challenge:

Hello there, cavemen and cosmonauts, people of the medieval times and modernity. 'Time' is a very wide topic. Everyone perceives it differently.

At MakeApp Club we want to see how you interpret it so we made "TIME - Art and Coding Challenge" for that purpose.

The challenge has been divided into two categories: Art and Coding.

> ▪ Art: and by 'art' we mean a wide variety of graphical projects – drawings, digital art design and much more.

How would you choose to depict TIME using your art form and practice. Create your designs and upload them on our platform and share them with all.

> ▪ Coding: This is a challenge for programmers – creating a game or a different, interesting app around the theme of TIME.

The most important things for us are creativity and clarity. We don't mind a touch of humour. ;)

Timeframe:

1st of Sept till Saturday 30th September

Have fun with it!
